

**PLEASE NOTE:** The following is a list of companies which have licenced inspectors and have opted to be listed on the Department's website. Prior to hiring an inspector to register a heating oil tank you should ensure the individual has a licence that is valid. The list below has been broken down into regions to make browsing easier. Companies are placed in the region where their main office is located. Several companies also do work outside their main office region, so please carefully look at the third column for approximate boundaries of the area normally served by the company. Where an oil company is shown in brackets with a company name, this indicates that the company services that oil company's customers only.
