HEATING OIL TANK OWNER**

HEATING OIL STORAGE TANK SYSTEM REGULATIONS, 2003

HANDOUT TO UNREGISTERED HEATING OIL TANK OWNER

You've received this handout because your heating oil tank has not been registered by the July 31, 2009 deadline set in the regulations.

- Your existing tank can no longer be legally operated unless you have arrangements to get it registered or replaced with a registered system.
- Registration can be arranged with a Licensed Inspector. Registration can also be arranged with some oil delivery companies or heating service contractors who employ Licensed Inspectors.
- The Licensed Inspector or Heating Service Contractor or Oil Delivery Company will schedule a date for the work to be done and for your tank to be registered.
- An oil company can then legally deliver oil to your tank until your tank is registered by that scheduled date.
- However if you cancel your scheduled work then the oil company cannot legally deliver oil to your tank.
- If you do not have such an arrangement and do not intend to get one then the operation of your tank is illegal. It must be emptied and properly disposed.
